

OneCheck COVID-19 Ag Saliva

**RAPID TEST FOR THE DETECTION OF
SARS-COV-2 ANTIGEN IN ORAL FLUID SPECIMEN**

- ✓ **Results in 15 minutes**
- ✓ **Non-invasive**
- ✓ **Simple use**
- ✓ **High accuracy**
- ✓ **No additional equipment required**

“OneCheck” COVID-19 Ag Saliva Rapid Test is a lateral flow chromatographic immunoassay for the qualitative detection of Sars-CoV-2 Antigen in oral fluid specimen as support to diagnosis of COVID-19. The test is able to detect, qualitatively and in a few minutes, the SARS-CoV-2 Antigen present in oral fluid samples.

The test is **not invasive** and does not require any type of equipment. All materials required for sample collection and processing are included in the kit.

REF: **TR189**
 PACKAGE: **10 test**
 SAMPLE: **Oral fluid**
 METHOD: **Qualitative chromatografic immunoassay**
 TIME TO RESULT: **15 min**
 STORAGE: **4°C - 30°C**
